

Keep a level head.

Instant leveling and precision camera adjustment at the touch of a button.

Don't waste time fiddling with tripod legs and bubble levels. **Level your camera in seconds** with microprocessor-controlled precision and perfect repeatability.

- When the schedule is limited but your shot list isn't, time is money. The CPS-h1 lets you **concentrate on the image** instead of the tripod.
- Provides a perfectly level platform for **panoramic photographers**. The precision-machined camera platform also features optional 15° click stops.
- Allows for quick setups on uneven ground and in unpredictable locations.
- Expandable system can be mains- or battery-powered.

New features:

- Turntable with optional click stops every 15° for manual panoramas
- Automatic power burst mode for heavier cameras
- Upside down mode for car shooters
- New Acadulus control unit for custom movements
